Manufacturing experience buyers can rely on

Garden product specialists since 2005

Xianju Taian is a family-founded manufacturer specialising in garden waste management products. Our manufacturing roots date back to 2005, when **Xianju Kangtai Garden Product Factory** was established. Building on this experience, we support retailers, brands and importers with reliable OEM and private-label production.

Our Xianju production campus combines sewing, assembly, inspection and export operations, with independent import and export rights since 2015.
